

# Water level in Lake Skorradalvatn 2024

The water level of Lake Skorradalvatn exceeded ON Power's limits in January, July and November of 2024 due to intense snow melting events and rainy periods. The water level never dropped below ON Power's limits in 2024. The Icelandic Meteorological Office has prepared an inflow model for Lake Skorradalvatn, which shows the inflow into the lake three days in advance.
